Importance: High

Hi all,

I'm not sure where you are in your review, but here is a revised RTC. The only edit made are on pages 35-36. Region 6 had some missing responses and this version includes them. They simply combined two comments into one and provided a response.

No other changes were made in this revised document.

Just an FYI, I will be out of the office Wednesday – Friday of this week.

Hi Mike and Doug,

The SO2 RTC Document is almost done, but not quite. We are still missing some responses, but for the sake of time, I'm going to go ahead pass along what I have to give you a head start. Please take some time to review this RTC and provide me your comments as soon as you can. In the meantime, I'll continue to work with the Regions to get the missing responses. There are two responses that will need to be drafted by HQs: the first one would be our rationale for extending the comment period once, but not a second time and the second is regarding the revocation of the standard. All suggestions on what to say for these two responses are welcome.

I'm out of the office on tomorrow, but will be back on Monday and Tuesday of next week.
